

Online Data Table 7

CZ-level life expectancy estimates for men and women, by income ventile

Description

This table reports life expectancy point estimates and standard errors for men and women at age 40 for each ventile (1/20th) of the national income distribution by commuting zone of residence. Both race-adjusted and unadjusted estimates are reported. Estimates are reported for CZs with populations larger than 250,000 only.

Codebook

Raw Variable Name	Variable Category	Variable Description
cz		Commuting Zone ID
czname		Commuting Zone Name
pop2000		Commuting Zone Population in 2000
fips		State FIPS
statename		State Name
stateabbrv		State Abbreviation
le_raceadj_v[i]_F	Female Life Expectancy by Income Ventile	Race-Adjusted, Ventile [i]
le_agg_v[i]_F		Unadjusted, Ventile [i]
le_raceadj_v[i]_M	Male Life Expectancy by Income Ventile	Race-Adjusted, Ventile [i]
le_agg_v[i]_M		Unadjusted, Ventile [i]
sd_le_raceadj_v[i]_F	Standard Error of Female Life Expectancy by Income Ventile	Race-Adjusted, Ventile [i]
sd_le_agg_v[i]_F		Unadjusted, Ventile [i]
sd_le_raceadj_v[i]_M	Standard Error of Male Life Expectancy by Income Ventile	Race-Adjusted, Ventile [i]
sd_le_agg_v[i]_M		Unadjusted, Ventile [i]
count_v[i]_F		Count, Females in Ventile [i]
count_v[i]_M		Count, Males in Ventile [i]
