## **Online Data Table 7**

CZ-level life expectancy estimates for men and women, by income ventile

## Description

This table reports life expectancy point estimates and standard errors for men and women at age 40 for each ventile (1/20<sup>th</sup>) of the national income distribution by commuting zone of residence. Both race-adjusted and unadjusted estimates are reported. Estimates are reported for CZs with populations larger than 250,000 only.
